Profile

Experienced Frontend Developer with 2+ years of professional experience. I have deep background in building highly scalable web applications and professional landing pages and multi-page websites. I have a strong understanding of the latest frontend frameworks and frontend technologies in general. I am motivated and enthusiastic and always eager to learn more.

Work experience

Frontend Developer   *February 2020 - August 2021*
Klevret • Full time

• Developed a highly scalable app with hundreds of people having online sessions at the same time with WebSockets and WebRTC

• Having direct contact with clients, advising them and being in important conversations about the development of the project

• Supervised new frontend developers and guided them

• Developed professional landing pages for clients that wanted a change on their website and business look

Education

Multimedia Design   *August 2021 - June 2023*
Business Academy Aarhus • AP

The focus of the studies are based on web programming, design principles and UX with a lot of team and personal projects so we use what we have learned in classes. I focus intensely on design and UX as these are skills that I want to improve.

JS Web Developer   *July 2017 - July 2019*
Software Univesity • Short-cycle higher education

In Softuni I worked intensely on web development with JavaScript. The studies were focused on learning JavaScript from the beginning to a skill with which you can find your first job. We have learned different technologies like React, Angular, NodeJS and others

Competences

HTML, CSS, Sass, JavaScript, React, Redux, VueJS, TypeScript, Git, JEST, Creative Thinking, Team Player
