PROFILE

I consider myself a very passionate front end developer with work experience on web applications. In my last job, I worked with different JS technologies based on client needs and I consider myself an expert in several of those. I have worked both on teams and lone projects and even lead some of the teams. I try to be up to date with the latest web needs and I think I can contribute with innovative initiatives to the programming tasks from day one.

WORK EXPERIENCE

Frontend Engineer   Feb 2020 - Aug 2021

Klevret • Full-time

During my time at Klevret, I worked daily with the development of applications for various organizations and companies. The process at work went from idea to design, to final development of web application that had a strong focus on usability and relevant features across the Web.

EDUCATION

Multimedia Design   Sep 2021 - Jun 2023

Business Academy Aarhus • AP Degree

The focus of the studies are based on web programming, design principles and UX with a lot of team and personal projects so we use what we have learnt in classes. I focus intensly on design and UX as these are skills that I want to improve.

Javascript Developer   Jul 2017 - Jul 2019

Software University (Softuni)

In Softuni I worked intensely on web development with JavaScript. The studies were focused on learning JavaScript from the beginning to a skill with which you can find your first job. We have learnt different technologies like React, Angular, NodeJS and others.
